ABOUT ME

Enthusiastic Python Developer with six months of experience and a **six-month course completion** in **Python** and web development. Dedicated to continuous learning and eager to contribute my skills in creating effective software solutions within a collaborative team.

PROJECT WORKED

Title   : Student Course Management

Technologies Used : React ,Django REST Framework , MySQL

➢ **Course Management Portal**: Users can create, update, and delete courses, upload course content, and manage student enrollments.

➢ **Authentication & Authorization**: Role-based access control using JWT (JSON Web Tokens) to handle secure login for students and admins.

➢ **Course Tracking**: Each student has a dashboard view to track enrolled courses and completion status.

➢ **API Integration**: Integrated Axios for making API calls, ensuring efficient communication between the frontend and backend.

Title   : E_Commerce Platform

Technologies Used : MongoDB , Express.js, React.js, Node.js

➢ Designed and implemented a full-stack e-commerce platform using **React Context API** for managing state.

➢ Developed RESTful APIs using Node.js and Express.js to handle user authentication, product data, and order management.

➢ Collaborated with backend developers to implement API endpoints for customer orders and inventory.

➢ Used MongoDB for managing product inventories and user data, ensuring efficient data storage and retrieval for scalable applications.
